

# What's Hiding Amongst the Crowd?

A word is on the loose and now has tried to hide amongst a crowd of tall letters! Help write a function to detect what the word is, knowing the following rules:

- The wanted word is in **lowercase**.
- The crowd of letters is all in **uppercase**.
- Note that the word will be spread out amongst the random letters, but their letters **remain in the same order**.

## Examples

```
detectWord("UcUNFYGaFYFYGtNUH") → "cat"
```

```
detectWord("bEEFGBuFBRrHgUHlNFYaYr") → "burglar"
```

```
detectWord("YFemHUFBbezFBYzFBYLLeGBYEFGBMENTment") → "embezzlement"
```
